## THE HALLMARK DIFFERENCE

As one of New Zealand's leading suppliers of high quality commercial doors, Hallmark have a depth of specialist experience in medical environments. Behind every Hallmark product is a team of product designers, specialist doors engineers, product managers and project managers, ensuring every requirement of your project is attended to.

We pride ourselves on transparency and clear communication. From your first contact, we pay close attention to your specific needs to make sure all requirements are crystal-clear right from the outset. If unique solutions are needed we have significant technical talent within our team to deliver a world-class outcome.

Our commitment to excellence is behind our long-held reputation as the supplier of choice for many health care projects. That duty of care doesn't stop when we deliver the end product: all hospital and health care projects automatically receive our Premium Support service, whereby every 6 months for the entire period of your product warranty, we carry out product satisfaction checks to make sure you are completely happy with your Hallmark products.

HALLMARK  
PREMIUM SUPPORT

## Fire Doors

## Acoustic Doors

## GRP Hygiene Doors

## Anti-Ligature Doors

## Bariatric Hoist Doors

## Sliding Doors

## Reduced Swing Doors

## Custodial & Security Doors

## Radiation/X-Ray Doors

## Office & Administration Doors

## Functional Doors

## Safety & Security Hardware

# GRP Hygiene Doors

Hallmark GRP Hygienic doors are a glass reinforced polyester (GRP) moulded critical hygiene door for use in for hospitals, laboratories, research facilities, pharmaceutical, isolation rooms, hermetic applications and any environment where the highest levels of hygiene are required.

The pressure moulded encapsulated sandwich structure of Hallmark GRP Hygienic doors ensures they are completely waterproof and gas proof. Being a seamless leaf construction means they stay unaffected by continuous water and moisture even after decades of use.

## CHEMICAL RESISTANT

The non-porous smooth surfaces of Hallmark GRP Hygienic Doors make them extremely easy to clean. They have excellent resistance to most detergents, solvents and other strong chemicals

## IMPACT RESISTANT

Hallmark GRP Hygienic Doors are extremely durable and strong. They can withstand impacts and heavy use without denting or bending

## CORROSION FREE

Hallmark GRP Hygienic Doors will not rust. The surface material, glass reinforced polyester, tolerates tough and operational conditions excellently without splintering

## LIGHT WEIGHT AND SAFE

Hallmark GRP Hygienic Doors weigh approximately half of a conventional door. The light weight nature makes Hallmark GRP Hygienic Doors safe and easy to use – even with larger sizes

## HYGIENIC

Hallmark GRP Hygienic Doors are free of surface organic materials that promote the bacterial growth. The encapsulated door structure and smooth surfaces of make them extremely easy to clean and will not harbor dirt or bacteria

## DESIGN CO-ORDINATED

Hallmark GRP Available in a wide range of colours and accessories

# iGlass Electronic Vision Panels

Hallmark doors can be fitted with vision panels using iGlass electronic blind technology, providing privacy and hygiene benefits. iGlass Privacy replaces the need for venetian blinds or curtains which require ongoing cleaning or laundering. Switching can be by touch, switch, motion or voice.

## Electric Power Transfer

For solutions requiring electrical power, such as iGlass vision panels and Door Top Alarms, we are able to conceal an electric power transfer device in the edge of a swinging door, providing the means to transfer power from door to frame.

These units are completely concealed when the door is in the closed position.

## Hallmark Door Top Alarm Doors

We offer At Risk Patient Protection solutions designed to prevent and reduce the risks of ligature scenarios related to doors. Our hardware partners include a global network of specialist products, bringing the best of global product innovation to New Zealand.

Door Top Alarm doors have hardware technology built in to the top of a door to alert staff of a potential ligature attempt. It sends a signal to the staff attack system, alerting the clinical team when a patient has attempted to wedge something between the head of the door and the frame.

The Door Top Alarm has a discreet sensor installed across the full width of the door leaf, which detects if weight has been applied e.g. the weight from a ligature attempt using the top of the door, or if something is jammed between the top of the door and head of the frame.

To minimise false alarms, the system has a built in time delay, adjustable between 5 and 30 seconds. This ensures that the alarm won't be triggered by accidental bumps or patients playing with the sensor, only a sustained applied weight (as would be the case in a ligature attempt) will trigger the alarm and alert staff to respond.

The door top alarm is compatible with most duress or staff attack systems. When the alarm is triggered, a signal is sent to the designated system which then alerts staff via whichever means are currently in use by the facility and clinical team. This could be an audible alarm, staff indicator panel, pager, handsets, or main nurse station computer.

## Full Mortice Anti-Ligature Hinged Doors

Hallmark are able to offer full mortice single swing continuous geared antiligature SECURAHinge™ doors featuring anti-ligature tip designed for single acting doors.

- Gives your patients privacy
- Reduces your maintenance and overall lifecycle costs
- Can help reduce the risk of patient suicide and self-harm
- Tested to 250,000 cycles (equivalent to 10 years use)
